BIOETHICS IN THE AGE OF EMERGING TECHNOLOGIES:

AI AND THE PATIENT-DOCTOR RELATIONSHIP

Speaker: Silvia Salardi

October 22nd from 10.00 – 11.00 CET / 11:00 - 12:00 EEST

[Click here to register](#)

Organizer: University of Milano-Bicocca

DESCRIPTION

This webinar, organised by UNIMIB as part of the INVEST Alliance explores how Artificial intelligence is re-shaping the physician-patient relationship. What are the ethical questions arising by the use of AI? How does it impact on the communication process between the doctor and the patient? These are some of the relevant questions that will be addressed during the webinar and that are at the center of institutional concerns.

SPEAKER

Silvia Salardi is Associate Professor of Philosophy of Law and Bioethics. She has dedicated the past 15 years to analyse and discuss changes brought about by emerging technologies within medicine and to propose governance pathways to address the ethical-legal questions arising by unprecedented technological innovation.
